

# Overview of the Opportunity demo

*Open iPhone6s simulator with XCode and run Opportunity app as fresh install*

- Start at iPhone simulator home screen with no app installed
- Build and run XCode project to install app
- Explain Welcome screen and walkthrough that will be there in future versions
- Navigate to app home screen and permissions dialog will popup.
- Explain why we need the app permissions and why there is an extra dialog on first launch
  - The app dialog will appear whenever the app is opened with insufficient permissions
- The Opps list is empty (in future versions there will be an empty state view to get the user to add their first Opp)
- Create a new Opp
  - Name: Watch Sunrise
  - Conditions: Timerange, Weather
  - Colour: Yellow
- Create another Opp
  - Name: Go to McDonalds
  - Colour: Red
  - Conditions: Timerange, Location
  - Add Weather Condition by accident
    - Show deleting of a Condition
- Add another Opp
  - Name: It is raining
  - Conditions: Weather
  - Colour: Blue
- Disable this Opp
  - Explain how deleting and disabling Opps works
- Sort the Opps
  - In a multitude of different ways
